ANTI-MICROBIAL TREATMENT

ANTI-MICROBIAL TREATMENT FOR BOTH SOFT and HARD SURFACES

FEATURES

A pleasantly scented anti-microbial treatment used for both soft and hard surfaces, such as textiles of upholstery, mattresses, carpet, drapes, rugs and stainless steel, porcelain urinals, sub floors and concrete slabs. ANTI-MICROBIAL is Australia's leading treatment for urine odour eradication. Economical when diluted and used according to instructions.

For treatment of bacteria, mould, fungi, sewerage, urine, water damage, flood damage and musty odours. It removes the source of the bad odour leaving the treated area smelling fresh and clean.

A concentrated ANTI-MICROBIAL provides immediate relief from bacteria infestation and malodour caused by urine, fungal and mould, it provides long lasting benefits of the residual activity for up to 1 year.

ANTI-MICROBIAL assists those who have allergies of skin, and respiratory systems, aggravated by fungi, mould and bacteria. Beneficial for allergies such as asthma, sinus, hay fever, eczema, psoriasis and dermatitis.

DIRECTIONS FOR USE

Dilute 400mls ANTI-MICROBIAL to 600mls water. Always apply in a downward direction. Apply in one direction and overlap each pass by 50% to ensure full coverage. When the application is done agitate the treatment vigorously into the fabric using an upholstery brush or into the carpet using a carpet rake.

COVERAGE: When mixed according to instructions: 12-15 sqm per ltr.

URINE ODOUR: Dilute 200mls of ANTI-MICROBIAL to 800mls of water for carpets, rugs, drapes, mattresses and upholstery and apply as a last step treatment according to the instructions above.
