BEBRITE - ANTI MICROBIAL TREATMENT

ANTI-MICROBIAL TREATMENT FOR BOTH SOFT and HARD SURFACES

DESCRIPTION

A pleasantly scented anti-microbial treatment used for both soft and hard surfaces, such as textiles of upholstery, mattresses, carpet, drapes, rugs and stainless, porcelain urinals, sub floors and concrete slabs. Australia's leading treatment for urine odour eradication. Economical when diluted and used according to instructions.

The first choice for treatment of bacteria, mould, fungi, sewerage, urine, water damage, flood situations and musty odours. It truly removes the source of the bad odour leaving the treated area smelling fresh and clean.

A concentrated anti-microbial providing immediate relief from bacteria infestation and malodour caused by urine, fungi and mould, It provides long lasting benefits of the residual activity for up to 1 year.

Bebrite Anti-microbial helps people who have allergies of the skin and respiratory system aggravated by fungi, mould and bacteria. Allergies such as asthma, sinus, hay fever, eczema, psoriasis and dermatitis.

Application

Bebrite Anti-microbial after being diluted according to instructions 600mls water to 400ml of Bebrite Anti-microbial is always applied in a downward direction from the pump up sprayer under low pressure of 35-65 psi. It should not be aerosolised. Apply in one direction and overlap each pass by 50% to ensure full coverage. Use only 6504 or 8004 fanjets for carpets and rugs. Use only 65015 or 40015 fanjets for drapes and upholstery. When the application is done agitate the treatment vigorously into the fabric using an upholstery brush or carpet using a grandee groomer.

Coverage When mixed according to instructions coverage: 12-15 sq. M/ltr.

Urine Odour Dilute 800mls of water with 200mls of Bebrite Anti-microbial for carpets, rugs, drapes, mattresses and upholstery and apply as a last step treatment according to the instructions above.
